

WALKER BAG

Needed: 2 pieces of fabric 16"-18" x 42"

6" of $\frac{3}{4}$ " Velcro, cut into 2- 3" pieces

With right sides together, sew around the pieces of fabric leaving about a 2-3" opening on the side so you can turn the fabric right side out. Press and stitch the opening closed. Find the center of the tube and mark it. Go down 5" from the center and $1\frac{1}{2}$ " in from the side on both sides of the tube and on both sides of the center line and mark this. Take your 3" Velcro pieces apart and sew half on each side of the center line down from the 5" mark and in $1\frac{1}{2}$ " from the side.

After the Velcro is sewn, stitch across the 16" end about $\frac{1}{4}$ " from the edge (this will be the top of the pocket), then turn to the other side and fold the sides up to meet the Velcro stitching, making pockets. (Velcro is on back side, pockets on front.) Stitch down on each side and topstitch all the way around. You can stitch down the center to divide the large pocket into two.
